Robust.
Practical.

PRIMO 2

In addition to its high-quality materials and handy features, PRIMO 2 is distinguished by its contemporary design. Variable, screwless end caps lend an air of assured style. At the same time, the cable rewind helps with tidiness, while an optional design strap ensures maximum flexibility. Whether suspended horizontally, screwed on or hanging up – the PRIMO 2 is attractive and the perfect choice of power distribution for any contemporary office or home.

Function meets design: the PRIMO 2 impresses with its new technical, application-specific and user-oriented variants. For example, surge protection, a USB-A and C charger or a classic residual-current device can all be custom-integrated.

BENEFITS

- **Screwless end caps**
- **Concealed mounting possible**
- **Tidier with cable rewind**
- **Optional suspension strap**
- **Sleek, appealing design**
