

## TecLines TKM013W

### USB-A 3.0 Keystone Module female/female

## Description

The TecLines Keystone USB 3.0 socket A / socket A custom module is a building block for video, audio and network connections. In many of the multiple sockets that are mounted in / on the table or wall, there are empty fields. The Keystone custom modules can be simply attached to these empty spaces with a screwdriver and assembled individually according to requirements. CUSTOM MODULES can be replaced quickly. They offer a high degree of flexibility and future-proofness in the dynamic world of data and media connections. A wide selection of components for video, audio and network connections in the TecLines sockets and connection panels is available.
