

TecLines TKM017 Keystone Module Cat6a RJ45, tool-free

Description

The Cat6a Keystone module TKM017 enables the connection of a network cable and offers the flexibility to use different cable types. Thanks to their standardized dimensions, the Keystone modules can be easily inserted into commercially available custom module frames to fill an unused position in a configurable socket or patch panel. Possible areas of application include offices, meeting rooms, exhibition halls and hotels. TecLines - Intelligent technology by creative minds.
